EUDR Statement

We hereby declare that our product, RFID Tags, is out of scope of the EU Deforestation Regulation (EUDR, Regulation (EU) 2023/1115).

This conclusion is based on the Harmonized System (HS) code classification used for our RFID tags:

HS Code: 8523521000 – Smart cards / RFID devices

Products classified under HS code 8523521000 are not included in the commodities and products listed in Annex I of the EUDR. Therefore, RFID tags do not fall under the scope of due diligence obligations related to deforestation-free supply chains.

As a result:

- RFID tags are not subject to EUDR due diligence requirements
- Our clients are not required to request or provide deforestation-related due diligence information for this product.

We will continue to monitor regulatory developments to ensure ongoing compliance and transparency.

Questions or comments may be directed to Global Compliance Team by email at rbis.adsproductcompliance@ap.averydennison.com

This information is for guidance only. No laboratory analysis has been conducted to confirm the compliance. It is based on our most up-to-date knowledge and experience. However, this statement does not constitute any warranty, express or implied. All such warranties are hereby disclaimed by Avery Dennison Smartrac. There are no warranties that extend beyond those expressly given. Supply chain information currently available is not comprehensive for all raw materials used in our manufacturing processes and that collecting information from the raw material supply chain is an on-going activity that may prompt revision of this information without notice.
